4. Fire 5. wheel

- C. 1. Early humans hunted animals and gathered fruits, roots, nuts and seeds. Thus, they were known as hunter-gatherers.
2. The early humans used stones of different sizes to make tools. These tools were used for cutting and making things. They were also used as weapons for hunting and protecting the humans from wild animals.
3. The invention of the wheel made the movement of heavy objects easier.
- D. 1. Early humans carried loads on their backs or used animals and sledges. In the process, they learnt that it was easier and faster to move heavy objects by putting rounded sticks under the sledge. This way, the wheel was invented.
2. Early humans ate wild fruits and nuts. They noticed that the seeds grew into new plants. They began to collect seeds and spread them on soft stretches of land. Many of them grew into plants. This is how they started farming.
