- C. 1. They hunted small animals and gathered fruits, roots, nuts and seeds. Therefore, they were known as hunter-gatherers.
2. Early humans used stone tools to cut and make various things. The tools were also used as weapons for hunting and for protecting the humans from wild animals.
3. The invention of the wheel ensured the easier movement of heavy objects from one place to another.
- D. 1. Early humans carried goods on their backs or used animals and sledges. In the process of evolution, they learnt that it was easier and faster to move heavy objects by fixing rounded sticks under the sledge. This is how the wheel was invented.
2. Early humans ate wild fruits and nuts. They noticed that the seeds grew into new plants. They began to collect seeds and spread

them on soft stretches of land. Many seeds grew into plants. This is how they started farming.
